MESSAGE FROM THE REGIONAL CO-CHAIR

Dear Governor Cuomo,

On behalf of the Mid-Hudson Regional Economic Development Council (MHREDC), I am pleased to present our 2021 Annual Report supporting the State's efforts to "Reimagine, Rebuild, Renew" in the wake of the public health and economic crisis spurred by the COVID-19 pandemic.

New York State was thrust into the national and global spotlight in March 2020, with one of the country's first COVID-19 clusters occurring in the City of New Rochelle in Westchester County, where thousands of Mid-Hudson residents lost their lives during the course of the pandemic. Thanks to your leadership, New York State "flattened the curve", and provided a model for the nation on coordination and delivery of COVID-19 vaccinations, all with significant supply challenges. As of the writing of this report, more than 70% of adult New Yorkers have received at least one dose of the vaccine, which includes more than 1.2 million Mid-Hudson residents.

We offer our deepest gratitude to you and your administration, state and local government staff, and to the many businesses, not-for-profits, and individuals whose heroic acts have contributed to where we are today.

Much like the health effects of the virus, the economic impacts of this crisis have exacerbated preexisting inequities. Thousands of people in the region lost their jobs or had their working hours reduced, and many businesses and not-for-profit organizations were forced to close permanently.

The Mid-Hudson region and New York State will now need to Reimagine, Rebuild, and Renew. Prior to the pandemic, the Mid-Hudson region has been awarded more than \$713 million in rounds I through IX of the Regional Council Initiative, with 921 awards supporting projects that align with the Council's **LIVE, WORK, and PLAY** strategy, as well as statewide priorities. We are proud to report that 87% of these projects are either complete or progressing, representing a strong return on investment: for every \$1 of state funds, more than \$7.50 of economic activity is generated. In total, these state investments in the Mid-Hudson are projected to generate more than \$2.7 billion in economic activity. The Council's successful track record on providing regional perspective and expertise makes us well-equipped to advise the state on pathways to recovery.

In closing and on behalf of my Council colleagues, we hope that this document provides you with a helpful on-the-ground perspective on how, together, we can Build Back Better, and come out more united, equitable and resilient in the face of future pandemics, challenges resulting from climate change, and whatever else may come our way. Our Council is excited about the work we have accomplished in the past decade, and we look forward to supporting the recovery from this historic crisis.

Regards,

Donald P. Christian, Ph.D.

Regional Co-Chair, Mid-Hudson Regional Economic Development Council
President, SUNY New Paltz

PART ONE

Executive Summary

The Mid-Hudson Regional Economic Development Council (“MHREDC” or the “Council”) sees a bright future ahead. The recovery from the COVID-19 pandemic is well underway and many projects in the region’s seven counties are getting back on track.

As of the writing of this report, New York State has surpassed a key recovery milestone of having **70%** of adult New Yorkers with at least the first dose of a COVID-19 vaccine. As a result, Governor Cuomo has lifted the State of Emergency put into place in March 2020, businesses are resuming operations, and there is a renewed sense of optimism.

It is imperative to reflect on and learn from the events of the last sixteen months in charting a path forward. In March of 2020, patient zero was to be the first case of COVID-19 to be diagnosed in New York State. He was a resident of the City of New Rochelle in Westchester County. The images of overflowing hospitals, temporary morgues, and grieving families as the death toll mounted will forever be etched in our memories. The news stories struck the Mid-Hudson region very hard and nothing has been the same since.

These events would lead to a cascading set of never-before contemplated decisions to close the New York State economy and curtail social activities. Thanks to the leadership of Governor Cuomo, New York State would “flatten the curve” and go from the first state to be ravaged by

the virus to one that now has one of the lowest transmission rates.

With lessons learned from the pandemic, it is now paramount for the region to get to work to “Reimagine, Rebuild, and Renew”, Governor Cuomo’s call to action for the economic recovery. The region’s manufacturing, healthcare, hospitality and tourism, and life science industry clusters are beginning to thrive once again and the MHREDC sees these positive signs of recovery as a catalyst to take the region to the next evolution of success.

“With more New Yorkers getting vaccinated every day, it’s time to turn the page, rebuild our state’s economy and look forward to a new economic future for New York”

– Governor Andrew M. Cuomo

The Mid-Hudson Regional Economic Development Council has drafted this document with full knowledge that due to the fluidity of the COVID-19 crisis, and the transitional state of the economy, data points in this report will change, and it may make sense to revise some of the strategies as the region's economy evolves to whatever the "new normal" will be.

Although the region and state are well into the recovery and economic rebound from the pandemic, the challenge faced by all regions is interpreting trends in economic conditions, which will continue to be difficult to interpret in real time. The onset of remote work and education, telehealth, and drastic changes in both the residential and commercial real estate markets, all represent major paradigm shifts in the way the region operates. The Council is also cognizant of

the region's aging infrastructure and equitable access to quality, affordable broadband, especially in rural areas and in many urban centers.

The challenges associated with these changes simultaneously represent opportunities to advance the region and continue to improve resiliency while adapting to the new normal and preparing for potential future shocks to the economy. Advances made in technology over the last sixteen months have led to efficiencies within the public and private sectors with new delivery systems for government and corporate services. The assessment of challenges has resulted in the Council's continued resolve in accomplishing the strategy of **LIVE, WORK, PLAY**. Further, the Council must move forward with the implementation of the strategy through the lens of diversity, equity, and inclusion.

Painters Point, Governor Mario M. Cuomo Bridge

MHREDC Strategy

The Mid-Hudson Regional Economic Development Council imagines a future that includes dynamic community centers featuring businesses in thriving industry sectors, residents from all walks of life benefiting from quality employment, and countless tourist attractions that make the Mid-Hudson a unique destination and place to live.

Thornwillow Makers Village, Newburgh, Orange County

LIVE

A strategy that seeks to revitalize the region’s many river, hilltop, and crossroads urban centers by encouraging activities that accelerate placemaking and promote environmental justice. Efforts in smart growth and transit-oriented development, downtown revitalization, workforce housing, infrastructure improvements – including restoration, rehabilitation and repurposing of existing assets and capitalizing on natural resources – will stimulate job creation, inspire innovation and retain and attract residents.

Spectrum Designs, Nicholas Center, Pleasantville, Westchester County, Photo Credit: Dov Hyman and Amanda Gentile Photography

WORK

A strategy that seeks to attract and retain investment in the region’s mature and emerging clusters within the tradeable sectors of life sciences, advanced manufacturing, information technology, distribution, financial and professional services, and film and television production. The Council is focused on facilitating dialogue between these industries and the region’s many educational institutions to create and maintain pipeline for talent and to encourage innovation resulting from collaboration. Further, the Council continues to support the construction trades and diverse small business enterprises.

Tuxedo/Sloatsburg Corridor Revitalization Project – Sloatsburg, Rockland County

PLAY

A strategy that seeks to enhance residents’ quality of life and strengthen the region’s identity as a premier tourist destination due to its scenic beauty, abundant agritourism, flourishing food and beverage industry, rich arts and cultural scene, unique history, recreational assets, and proximity to New York City. Efforts within this strategy increase visitor spending and stimulate growth across related industries, including those in targeted tradeable sectors. Through this strategy, the Council also encourages development in its downtowns, which are popular with regional visitors and residents, further implementing the state priority of placemaking.

Update to the Regional Strategy

The Mid-Hudson REDC has determined that its **LIVE**, **WORK** and **PLAY** strategy has served the region well, having guided the Council to identify 141 priority projects since 2011, **78%** of which are complete or progressing.

Within the **LIVE** component of the strategy, the Council will be focusing more on the retention of residents, investment in infrastructure and healthcare, transit-oriented development, and downtown revitalization. For the **WORK** component of the strategy, the Council will be seeking ways to support the return to work of the region's workforce. To facilitate this, there is a need to reimagine the intersection of workforce, education, and economic development, and support the organization of the talent ecosystem in the region. Within the **PLAY** initiative, it is clear the pandemic ravaged the hospitality and tourism industry cluster. The Council seeks to foster new business openings and the expansion of the hospitality and tourism economy, with an eye on resiliency.

Previously Funded CFA Awards

Of the 921 awards that have been granted to Mid-Hudson projects through the Consolidated Funding Application (CFA) process since 2011, **87%** are complete or progressing and are projected to generate economic activity of more than **\$2.7 billion**. The state investments have been strategic, designed to have a strong return on investment. Every \$1 of state investment in Mid-Hudson CFA projects since 2011 is projected to generate \$7.50 in economic activity. This has positive ripple effects across the region and across industries, impacting the lives of the Mid-Hudson's diverse residents.

921 Awards

87% Complete or Progressing

7.5:1 Leverage Ratio

\$2.7 billion of Economic Activity

The Council identified 141 of the projects as priorities for the region due to their strong alignment with the regional strategy and statewide initiatives. Of these, 78% are complete or progressing and are projected to generate more than \$1.6 billion in economic activity. The leverage ratio (total project cost to total CFA award amount) is 15.7:1, again showcasing how the MHREDC has maximized the return on investment for the state's awards.

Reimagine, Rebuild, Renew

The MHREDC is looking forward to reviewing project proposals submitted through the CFA for the 11th round of the REDC initiative, and once again will be seeking projects that advance the regional strategy and statewide priorities, and also support the region's post-pandemic recovery. The Council will continue monitoring the region's recovery, and its four work groups – **LIVE**, **WORK**, **PLAY**, and **WORKFORCE** - with their integration of stakeholders throughout the region playing an integral role. The Council is prepared and eager to move forward and help the Mid-Hudson region with its efforts to reimagine, rebuild, and renew.

Through the **LIVE**, **WORK**, **PLAY** strategy, the Council will ensure the state's investments will continue to spur growth regionally. In this post-pandemic economy, the leveraging of private, federal, and municipal resources is a critical element to advancing the strategies in the Mid-Hudson region.

Walkway Over The Hudson

PART TWO

Strategy Update

Formed in 2011 by Governor Andrew M. Cuomo, the ten Regional Economic Development Councils provide a bottom-up approach to state economic development programs that guided New York State's recovery from the Great Recession and contributed to significant economic growth and historically low unemployment rates. The Mid-Hudson Regional Economic Development Council (MHREDC) has been particularly successful, securing more than **\$713 million** in state investments for more than 900 projects, 87% of which are complete or progressing, and generating more than **\$2.7 billion** in economic activity.

This section of the MHREDC's annual report has three components: a reflection on the Council's **LIVE, WORK, PLAY** strategy, including progress to date and challenges presented and/or exacerbated by the COVID-19 pandemic; an update to the Council's strategy; and an overview of statewide priorities and how they are integrated into the Council's regional strategy.

Overview of Progress Made to Advance the MHREDC Strategy and COVID-19 Impacts

LIVE

A strategy that seeks to revitalize the region's many river, hilltop, and crossroads urban centers by encouraging activities that accelerate placemaking and promote environmental justice. Efforts in smart growth and transit-oriented development, downtown revitalization, workforce housing, infrastructure improvements – including restoration, rehabilitation and repurposing of existing assets and capitalizing on natural resources – will stimulate job creation, inspire innovation and retain and attract residents.

PROGRESS TO DATE

Looking back over the past 10 years, the REDC's focus on the development of communities throughout the Mid-Hudson region has been energizing. With the assistance of the state's Consolidated Funding Application process, and more recently the Downtown Revitalization Initiative (DRI), the region has experienced a decade of advancement. Of the 110 active CFA awards that the MHREDC has designated as priorities since 2011, 36 advance the **LIVE** initiative, generating economic activity of more than **\$309 million**.

The region's communities have seen a renaissance from New Rochelle to Beacon and from Peekskill to Middletown. Additionally, with projects selected by the four Mid-Hudson communities that the Council selected as winners for the DRI, an additional **\$40 million** of state investment is advancing projects to the maximum benefit of the selected communities, region, and state. Beyond just the DRI communities, there has been increased pedestrian traffic, improved facades, the integration of water features, parks and more. The very amenities that were missing when the region felt its last surge of potential residents following 9/11 are in place today. Whether it is day visitors or an increase in residents, there is little doubt that pre-COVID-19 the Mid-Hudson REDC's **LIVE** strategy was working.

City of Middletown, Pavilion at Erie Way Park & Renovated Parking Lot, Downtown Revitalization Initiative

Mid-Hudson Past DRI Winners:

- Round 1: City of Middletown
- Round 2: City of Kingston
- Round 3: City of New Rochelle
- Round 4: City of Peekskill

CHALLENGES FROM COVID-19

Except for some limited infrastructure and housing projects, the pandemic put that advancement on hold. It was not until the state announced the projects to be funded as part of the City of Peekskill's Downtown Revitalization Initiative (DRI) and the 11th round of the REDC initiative, that communities felt the time had come to move forward once again.

Since the pandemic began in March 2020, there have been a number of challenges that have emerged with regard to the advancement of this strategy which are discussed on the following pages.

INFRASTRUCTURE

Progress to Date

Fortunately, one of the few areas that was able to continue investment under state guidelines was infrastructure. Communities throughout the Mid-Hudson region were able to continue to directly fund, bond or access state and federal programs to improve infrastructure. A recent CFA project to highlight this includes the improved exit 125 along State Route 17, with a newly constructed flyover bridge that connects to the improved Harriman Drive leading up to **LEGOLAND New York Resort**. This infrastructure upgrade is designed to help absorb increased visitor vehicle traffic, while at the same time diverting the traffic away from local roadways, thus avoiding overburdening the local road systems. Investments in infrastructure improvements such as this are going to be needed on a more urgent basis due to the age, complexity and expanse of some of these historic infrastructure systems that abound in the Mid-Hudson region.

Challenges

Infrastructure includes transportation systems, roads, bridges, water/sewer, utilities (energy) and more recently upgraded broadband and wi-fi. The operations of infrastructure systems is critical to everyday life. These systems, which include water, sewer, and wastewater, must be operating at full capacity for the region to function. Despite significant improvements there exist many examples of infrastructure in need of significant investment. Many of the operators within

Jawonio, New City, Rockland County

these specialized fields are retiring and there must be a succession and talent attraction plan established. A combination of remote work, anxiety and fear of dense urban environments, is reducing the volume of commuters and putting additional stresses on other regional infrastructure systems. While traditional infrastructure will always need continuous investment, other areas - “Green” and broadband – now require specific attention and funding.

Shared Pedestrian Walkway, Governor Mario M. Cuomo Bridge

LEGOLAND New York, Goshen, Orange County

Green Infrastructure

Energy supply will become an even greater issue with a continued influx of people and businesses in the Mid-Hudson region. The recent closure of the Indian Point Energy Center and the need to generate additional power to feed the growing manufacturing industry coupled with the push for Green Energy is placing an enormous challenge on the region. With the closure of Indian Point, the challenge of finding alternative energy sources has never been as great for the Mid-Hudson region. These challenges must be met in order to meet the goals and objectives of the 2030 energy plan. However, these challenges and the need for a sustainable and renewable energy source represents an incredible opportunity to create good-paying green jobs in the region.

Broadband

The need for digital communication and technology has been quickly elevated and there is an overwhelming challenge for access to broadband. The extraordinary reliance on remote work, long distance learning, and telehealth represents a basic need for people, business, healthcare, education, and government to function. This represents a challenge in terms of capacity to utilize technology that supports everyday life, business, and critical decisions. Challenges associated with cybersecurity rapidly come into focus with the increased use of technology. Business models must immediately adapt to remote work and allow for internal policy and human resources to work within this new paradigm. Broadband improvements must also increase through the lens of equity, whether that is the need to increase coverage or the need to provide service at lower cost, both of which the state and federal government are making investments that will have significant impact on people's lives and the economy.

Healthcare

Progress to Date

The integration of regional healthcare systems has provided additional services to the residents of the Mid-Hudson region, leading to improved healthcare outcomes. The ability of local hospitals and healthcare networks to draw upon expertise not located directly within the region enabled improvements to delivery systems. However, due to the onset of COVID-19, it became apparent that healthcare needed to act as one system as opposed to entities working individually. All

healthcare resources were redirected to combatting the pandemic. The Life Sciences sector played a critical role in the development of both the vaccine and antibody therapy that have been used throughout the world. Local companies were able to pivot and assist in the manufacturing of critical Personal Protective Equipment (PPE).

Challenges

The provision of healthcare services had been severely disrupted during the pandemic. The healthcare "system" faced daunting policy and financial challenges. The costs associated with the pandemic on hospitals created fiscal impacts in the billions of dollars. People put off elective surgery, providers had to cobble together safe ways to come into the office or to meet via telehealth visits. The pandemic further exposed the need to address a multitude of health care concerns, including obesity, diabetes, heart disease, the growth of addiction and the increase in mental health issues, which were all exacerbated during this time. For the near future, we must remain vigilant as a region to possible new strains of COVID-19, increased vaccinations or booster shots and insuring the production and stockpiling of PPE throughout the region.

Food insecurity became exposed as one of the basic needs for people throughout the region. Due to the impact of COVID-19 on the economy and the loss of jobs, thousands of people in the region faced the issue of having enough resources to purchase food. The face of people with food insecurities has changed and the region continues to grapple with a huge demand for services related to securing and distributing food to residents. The interruptions in the overall food supply chain has resulted in dramatic increases in the cost of food and has placed many additional challenges on residents, designated food pantries, and community-based organizations with the mission of getting food directly to those in need.

The region's agricultural community has some capacity to add to the food supply chain; however, this does not come without its challenges. The processing and distribution of certain agricultural products has been a challenge. Labor shortages have continued to be an issue faced by many local growers. The ripple effect of the economic shutdown placed a huge financial burden on the agri-business industry.

Transit Oriented Development

Progress to Date

Investments in transit-oriented development, downtown revitalization efforts, and the acceleration of placemaking have made the communities of the Mid-Hudson region more desirable than ever. Despite the prioritization of transit-oriented development, progress to date has been limited. This is often due to the inability to find public-private partnerships that meet the challenges posed by the communities in which they are located.

Challenges:

Commercial and residential housing around traditional train-stops is the classic definition of transit-oriented development. During the pandemic, and as a result of the trend to remote work, ridership has not returned to rail lines in the Mid-Hudson. The collapse of ridership is yet another challenge facing the Mid-Hudson region. One of the root causes of this was the increase in the ability to work remotely. It remains unclear if that ridership will return to pre-pandemic levels. Yet getting communities to support this form of rail and bus-assisted housing remains a large challenge to the region.

WORK

A strategy that seeks to attract and retain investment in the region's mature and emerging clusters within the tradeable sectors of life sciences, advanced manufacturing, information technology, distribution, financial and professional services, and film and television production. The Council is focused on facilitating dialogue between these industries and the region's many educational institutions to create and maintain a pipeline for workforce and to encourage innovation resulting from collaboration. Further, the Council continues to support construction the trades and diverse small business enterprises.

Progress to Date

Three priority industry clusters featured in the **WORK** initiative - film and television, manufacturing & distribution, and life sciences – have become emerging industries that show promise for growth in the region. Advanced manufacturing, information technology, financial and professional services continue to be strong assets to the region and also a source of well-paying jobs. Prior to the pandemic the region had achieved record low unemployment rates.

Since 2011, the Council has identified **58 priority projects** that advance the **WORK** strategy, of which **79%** are complete or progressing. State awards for these projects total more than \$45 million and are projected to generate over \$550 million in economic activity.

CHALLENGES FROM COVID-19

Pre-pandemic, the region's success was accompanied by a challenge – every sector struggled to fill vacant positions. The reasons for this were simple: not enough workers, and positions that required even more complex skills. The skill sets of the unemployed did not match the employment vacancies.

The pandemic exacerbated workforce challenges even though the unemployment rate pre-COVID was the lowest in 50 years. Now with double the number of workers unemployed, many businesses have a “help wanted” sign in their windows. There were many issues related to the loss of the region's workforce, which included a lack of applications, a mismatch in skills, and a disproportionate loss of women in the workforce likely due to child care issues. These barriers to employment were further highlighted due to limitations placed on businesses in order to reduce the spread of COVID-19. Connecting the unemployed labor pool with talent-seeking industries is an immediate need that must be addressed. As the recovery continues, linking the newly trained workforce with job opportunities represents a major challenge. Expanded job boards and databases

are key to meeting these challenges of a region that must retain and attract a qualified workforce. Other challenges were exposed including the lack of workforce housing, and the inability for transportation to link people from where they live to where jobs are located.

The pandemic has revealed a few challenges related to both manufacturing and warehouse distribution sectors. Automation and robotics will change the operations and workforce landscape in the warehouse and distribution sector as well as manufacturing. This represents a challenge to retraining the workforce and retooling the businesses, both of which represent opportunities for jobs. As technology continues to grow within these sectors and local businesses look to grow in the region, many jobs need to pivot and evolve.

At all levels of education there needs to be an enormous reengineering of how to prepare graduates for the future workforce. This will require a better understanding of where vacancies exist and then realigning programs to fill those positions. Therefore, the region is facing the need for a skills realignment and workforce training to provide a strong labor pool.

Current supply chain disruptions, however temporary, will impact hiring needs as well as skills. There needs to be a greater emphasis on the production of goods and locally sourced materials to avoid future supply chain issues.

Due to the Mid-Hudson's proximity and access to a vast network of interstate highways, the region has become a warehouse distribution hub. This has created a cluster within the industry, specifically in Orange and Dutchess counties. The cluster has recently attracted a few national companies such as Amazon, Medline, and Cardinal Health. This growth has not come without its challenges, which include regulatory barriers and a complicated development process that injects uncertainty into an already complex formula of incentives and construction.

PLAY

A strategy that seeks to enhance residents' quality of life and strengthen the region's identity as a premier tourist destination due to its scenic beauty, abundant agritourism, flourishing food and beverage industry, rich arts and cultural scene, unique history, recreational assets, and proximity to New York City. Efforts within this strategy increase visitor spending and stimulate growth across related industries, including those in targeted tradeable sectors. Through this strategy, the Council also encourages development in its downtowns, which are popular with regional visitors and residents, further implementing the state priority of placemaking.

Progress to Date

The surge in visitors to the Mid-Hudson is but one of the metrics that indicate that this strategy has succeeded. This can be witnessed by the dozens of new hotels, the opening of world-class destinations such as **LEGOLAND New York, The Resorts World Casino & Spa**, upgrades to the **Walkway Over The Hudson**, the conversion of regional malls to area destinations, the growth of the Rail Trail system, the increase in agritourism, the exponential growth in the food and beverage industry (especially micro-breweries and distilleries), and an increase in the number of bed & breakfasts.

One indication of the cumulative impact of the **PLAY** strategy can be seen in the following table:

Furthermore, there are 28 active projects the MHREDC identified as priorities through the CFA process that advance the **PLAY** initiative. The state investment in these projects is more than **\$27.7 million**, which is expected to generate **\$817 million** in economic activity.

PLAY, as a strategy, was indeed working prior to the pandemic.

CHALLENGES FROM COVID-19

The region is home to dozens of tourist attractions, miles of outdoor hiking, walking, and biking trails, entertainment venues, and restaurants and cafés. Although a vast majority of the tourism economy pays low wages, it employs thousands of people in the region, both directly and indirectly. Now, the largest challenge is establishing that workforce. As other industry sectors wage rates improve, in order to compete for labor, hospitality and tourism wages must increase. Economic and fiscal policy decisions at both the state and federal level combined with the shut down due to the pandemic, resulted in severe labor shortages inhibiting the restarting of the sectors found within the **PLAY** strategy. The tourism and hospitality industry have been a major revenue source to state, county, and local municipal governments, as it represents a multi-billion-dollar industry. The tourism economy has an enormous ripple effect throughout the region with hundreds of small businesses reliant on visitors.

Mid-Hudson Tourism Economic Impact 2019					
	Direct Sales	Labor Income	Employment	Local Taxes	State Taxes
Dutchess	\$674.2	\$378.1	10,836	\$45.8	\$36.7
Orange	\$1,047.4	\$427.8	14,364	\$90.4	\$58.3
Putnam	\$66.3	\$31.7	1,375	\$4.5	\$3.6
Rockland	\$489.7	\$269.6	8,726	\$31.0	\$26.7
Sullivan	\$577.9	\$242.7	5,854	\$35.7	\$31.5
Ulster	\$684.6	\$354.3	9,561	\$44.4	\$37.3
Westchester	\$2,011.3	\$1,156.3	24,463	\$128.3	\$109.7
TOTAL	\$5,551.40	\$2,860.50	\$75,179.00	\$380.10	\$303.80

*Dollar amounts in millions of nominal dollars, employment in persons

Seminary Hill Ciders, Callicoon, Sullivan County

As foot traffic became non-existent, the region witnessed the loss of many cafes, restaurants, boutiques, specialty shops, and other “Main Street” businesses. Some of these businesses were able to capture additional revenue by increasing or creating an online presence, but not all.

Marketing the Mid-Hudson region as a destination will support the recovery of large and small businesses. The creation of local and regional campaigns to stimulate the tourism and hospitality industry must take center stage, to ensure we recapture and expand tourism revenue. Its continued success requires that we find a balance between marketing and the preservation of open space for outdoor recreational activities.

There are also pre-existing and expanding barriers to small business. There has always been language and cultural differences, as well as disparities in access to capital for minority owned businesses and entrepreneurs. There is an enormous need to raise local capacity to provide equal access to resources, albeit

financial, training, or technical assistance with meeting regulatory requirements. The magnitude of these needs has drastically increased.

Additional Challenges Facing the Region

Societal inequity is a challenge that cuts across the MHREDC’s **LIVE, WORK, PLAY** strategy. While not a new challenge to this region, COVID-19 has made the Mid-Hudson region more acutely aware of the disparity in pay, healthcare and housing for people of color as demonstrated by the disparate impacts of the virus on people’s health and livelihoods based upon race and ethnicity. The need for a more equitable approach to the workforce and economic recovery requires the Mid-Hudson to call it out as a separate challenge and yet it applies to all three strategies.

The Council will be looking at each of the components of the **LIVE, WORK, PLAY** strategy through a diversity, equity, and inclusion lens, and charging the Council’s work groups to determine how best to implement any changes to each of the strategies.

MHREDC'S UPDATED STRATEGY

The Mid-Hudson REDC has determined that its **LIVE**, **WORK** and **PLAY** strategy has served the region well, having guided the Council to identify 141 priority projects since 2011, 78% of which are complete or progressing. Based on the success of this strategy, the Council recommends making some adjustments to the strategy in order to support the region's recovery from the COVID-19 pandemic.

The following pages articulate the updated MHREDC strategy, which will inform how the Council evaluates applications through the CFA process going forward.

A strategy that seeks to revitalize the region's many river, hilltop, and crossroads urban centers by encouraging activities that accelerate placemaking and promote environmental justice. Efforts in smart growth and transit-oriented development, downtown revitalization, workforce housing, infrastructure improvements – including restoration, rehabilitation and repurposing of existing assets and capitalizing on natural resources – will stimulate job creation, inspire innovation and retain and attract residents.

Goals:

- Support downtown revitalization and increased community and regional connectivity through planning and infrastructure initiatives, particularly in distressed communities.
- Retain and attract residents to the region in a balanced and equitable manner.

The Mid-Hudson Regional Economic Development Council imagines a future that includes dynamic community centers featuring businesses in thriving industry sectors, residents from all walks of life benefiting from quality employment, and countless tourist attractions that make the Mid-Hudson a unique destination and place to live.

WORK

A strategy that seeks to attract and retain investment in the region's mature and emerging clusters within the tradeable sectors of life sciences, advanced manufacturing, information technology, distribution, financial and professional services, and film and television production. The Council is focused on facilitating dialogue between these industries and the region's many educational institutions to create and maintain pipeline for talent and to encourage innovation resulting from collaboration. Further, the Council continues to support the construction trades and diverse small business enterprises.

Goals:

- Grow the region's talent base for priority industries.
- Increase opportunities for veterans and other underserved populations to secure employment.
- Attract domestic and international companies to the Mid-Hudson region.
- Increase opportunities for accessing capital across all sectors.

PLAY

A strategy that seeks to enhance residents' quality of life and strengthen the region's identity as a premier tourist destination due to its scenic beauty, abundant agritourism, flourishing food and beverage industry, rich arts and cultural scene, unique history, recreational assets, and proximity to New York City. Efforts within this strategy increase visitor spending and stimulate growth across related industries, including those in targeted tradeable sectors. Through this strategy, the Council also encourages development in its downtowns, which are popular with regional visitors and residents, further implementing the state priority of placemaking.

Goals:

- Enhance the natural, historic, and cultural assets of the region, resulting in improved quality of life for residents and increasing tourism in the region.
- Grow the tourism industry in a way that is balanced and sustainable.
- Establish sustainable growth for the MHREDC's Regional Economic Cluster Plan – the food and beverage manufacturing supply chain.

LEGOLAND New York, Goshen, Orange County

Queen City Lofts, Poughkeepsie, Dutchess County

LIVE

The **LIVE** initiative is a cornerstone of the Mid-Hudson region’s success. Ranging from the retention of residents and businesses to infrastructure and healthcare to transit-oriented development and the revitalization of the downtowns, **LIVE** is hallmark to the continued success of the region.

Many traditional economic paradigms have been disrupted since March of 2020. The goals associated with advancing the **LIVE** strategy are focused on rebuilding our foundation in a way that supports the economy and promotes the Mid-Hudson region as an amazing place to reside.

The largest challenge of this strategy is associated with the lack of affordable, workforce, and market rate housing. The housing element will only be possible with a corresponding priority of improving the region’s infrastructure, including water, sewer, roads, bridges, and broadband. The pandemic revealed the cracks in the healthcare system, but the resiliency of the regional network overcame these challenges.

To advance the MHREDC’s **LIVE** initiative, the Council prioritizes the retention of residents and businesses, investment in infrastructure and healthcare, transit-oriented development, and downtown revitalization.

Retention of Residents within New York State

An important goal of the MHREDC is the retention and attraction of new residents to the Mid-Hudson region through a balanced, sustainable, and equitable approach to development. The Council recognizes the critical need for the region’s economy to increase the supply of affordable, workforce, and market rate housing.

Types of projects that may address this area include:

- Local government streamlining of approval processes
- Adaptive reuse of buildings and underutilized lots
- Use of storefronts in downtowns for mixed-use development
- Local government support systems and policies to mitigate displacement
- Projects that will attract individuals living in New York City to relocate to the Mid-Hudson region as a lower cost alternative to prevent their leaving New York State
- Retention of seniors and the encouragement of “aging in place”
- Establishing the Mid-Hudson region as a leader to capture the new remote work paradigm

Downtown Kingston, Ulster County

Infrastructure

In the post-pandemic world more so than ever before, there is a critical need to invest in and improve traditional infrastructure systems including water, sewer, bridges, and roads to maintain existing structures and systems, and also to create new and expanded ones.

Access to affordable high-speed internet – or “broadband” – has emerged as an element of infrastructure that is critical for rebuilding and reimagining the region’s economy, expanding what has been considered traditionally under the umbrella of infrastructure.

There are a number of federal programs offering investment funding for infrastructure projects; there is an opportunity for state investments to leverage those federal dollars to the maximum benefit of the people and businesses in New York State and the Mid-Hudson region.

Types of projects that address this area may:

- Rebuild and reimagine the region’s infrastructure including broadband
- Leverage local, federal, and private sector funding to improve and maintain traditional infrastructure systems including: roads, bridges, water and sewer
- Improve and increase capacity for local wastewater treatment plants to support economic development
- Invest in the talent pipeline for workforce to operate infrastructure systems that run on advanced technology
- Capitalize on New York Stewart International Airport, an important state and regional asset, as well as other airports in the region both for logistics and tourism jobs
- Support the advancement of green infrastructure to meet the carbon neutral goals of 2030, including investment in workforce development

Healthcare

The improvement of the healthcare system of the Mid-Hudson region is another important priority area. The pandemic brought inefficiencies to light, which must be addressed to continue the recovery of the region and mitigate future challenges.

The pandemic has exposed the fractured system within the healthcare system and these challenges must be addressed. The use of technology like telehealth and telemedicine rapidly advanced health services. The Mid-Hudson region will continue to seek ways to invest in and improve the opportunity for equal access to these services.

Types of projects that may address this area:

- Enhance, improve, and sustain health, safety, food, and healthcare systems for the regional economy and build the foundation for long-range growth
- Facilitate and support local food production, manufacturing, and distribution to enhance and fortify the supply chain and connections with those in need while building capacity within the food industry
- Support and enhance the healthcare system to facilitate a balanced approach for the provision and delivery of services while maintaining a resilient business model and strong fiscal foundation
- Improve equity in access to healthcare services
- Invest in the talent pipeline for the healthcare industry

Vassar Brothers Medical Center, Poughkeepsie, Dutchess County

Transit Oriented Development (TOD)

In the past, TOD shortened the commuting time from suburban areas into employment in urban centers. Because of the pandemic and potential for hybrid forms of work continuing for an unknown period, TOD fosters the strategy of easy access to distant work sites and the benefit of living in communities throughout the Mid-Hudson region.

Types of projects that may address this area:

- Support development of residential and commercial opportunities at train and bus station for the potential of transit-oriented development
- Use smart growth principles and transit-oriented development to support projects that rehabilitate and enhance the region's unique and diverse community centers
- Use transit-oriented development to support the emerging hybrid nature of the workforce

Downtown Revitalization

There are a number of small cities scattered throughout the region that suffered urban decay and disinvestment over the last 50 years. Downtown revitalization of these urban cores is critical to the re-imagining of the Mid-Hudson's cities. Today's new cities must be "smart" and designed for a 24/7 experience that captures the entrepreneurial spirit of our existing residents and newcomers alike. The state has now invested **\$40 million** in the Mid-Hudson over the last 4 years through the Downtown Revitalization Initiative (DRI), which has led to the leveraging of millions of dollars in private investment. To further these revitalization efforts, the Mid-Hudson REDC is focused on meeting the challenges of residents, small businesses, and community-based organizations through additional investment of resources.

The continued advancement of investment in downtowns is vital for the region for recovery to continue, we need to be creative, forward thinking, and willing to make changes that may not have been considered before.

Types of projects that may address this area:

- Support access to capital
- Focus on retaining and strengthening small businesses which provide a pathway to prosperity, equity and wealth, and mitigates generational poverty
- Facilitate and support waterfront development
- Increase opportunities for small businesses to secure vendor contracts for larger businesses in the Mid-Hudson region
- Improve resiliency of small businesses to weather economic downturns

Saw Mill River Daylighting, Yonkers, Westchester County

LIVE: Past Project Highlight

Project Name: Thornwillow Makers Village (CFA #80890)

Location: City of Newburgh, Orange County

The Thornwillow Institute, a not-for-profit 501(c)3 organization committed to promoting and perpetuating the art of craft in all its forms, will be investing **\$1.6 million** in rehabilitating two historical properties in the City of Newburgh to create studios, an art gallery and a public bookstore and café. The Thornwillow Makers Village will become an iconic destination for craft and artisanal production that encompasses 100,000 square feet in and around five adjacent properties. To support this project, the MHREDC identified this as a priority project in round 8 and awarded an Empire State Development (ESD) Capital Grant of **\$320,000** for reimbursement of a portion of construction and rehabilitation costs. Lieutenant Governor Kathy Hochul attended a groundbreaking for the project in June 2021.

LIVE: Past Project Highlight

Project Name: Energy Square (CFA #54322)

Location: City of Kingston, Ulster County

RUPCO, an affordable housing agency, invested **\$22 million** into a mixed-use development in the City of Kingston's Midtown district. Energy Square is the first Net-Zero for Living affordable housing project in upstate New York and was named New York State Association for Affordable Housing's (NYSFAFH) 2020 Upstate Project of the Year. Its innovative design combines a geothermal ground source heat pump system with a solar PV system to produce enough energy to meet electricity usage for the entire building, providing additional cost savings to low-income and nonprofit tenants. The five-story building houses 57 mixed-income apartments managed by RUPCO; as well as 11,000 square feet of civic and commercial space that is now the new home of the Center for Creative Education (CCE), whose mission is to enrich the social and cultural awareness of youth through arts, wellness and education as well as other commercial tenants. The project received **\$1 million** through NYSERDA's Cleaner Greener Communities Grant in Round V and was awarded **\$6.3 million** in tax credits from Homes and Community Renewal.

WORK

WORK remains a key component of the MHREDC's strategy as the region faces a number of challenges coming out of the pandemic. The goals of maintaining and expanding the regional efforts in the region's key industry clusters of life sciences, advanced manufacturing and distribution, information technology, financial and professional services, and film and television. To facilitate investment in the region, the Council also continues to prioritize the construction trades as well as diverse small business enterprises.

The intersection of workforce, education, and economic development are the pillars to stand upon as the region presses ahead on the road to recovery. Returning to work is critical to our success and the region will reimagine, reintegrate, and rebuild the economy in a holistic and synergistic manner. In addition to facilitating the organization of the workforce ecosystem in the region, the Council sees a need for some core elements that enable the workforce to be successful to be in place such as child care support and resources, transportation and housing.

On the following pages several of the priority areas for the WORK initiative are discussed in more depth.

Advanced Manufacturing & Warehouse Distribution

The manufacturing and warehouse distribution clusters have never been more vital to the economic growth of the region. This cluster has long been a priority for the Council, and now is the time to expand and strengthen this cluster.

Types of projects that may address this area:

- Facilitate, support, and grow the Mid-Hudson region's existing footprint in manufacturing and warehouse distribution

- Retain, attract, and/or develop a skilled labor force to participate in growing industries
- Increase local capacity within the manufacturing industry to support multifaceted production capabilities, which provides for a competitive advantage for reshoring to the Mid-Hudson region
- Target large sites, either existing buildings for adaptive reuse or vacant land, with a goal of filling them with new manufacturing, warehouse distribution or supply chain opportunities
- Leverage existing educational and workforce development resources and facilitate connections among them, employers, and workforce
- Offer a package of benefits to retain and attract employees including support for child care
- Facilitate public-private partnerships to create a competitive workforce.

Life Sciences

The life sciences cluster – a state priority as well as a priority industry for the Mid-Hudson region – continues to be an area primed for growth for the region. The Council seeks to grow the Mid-Hudson's life sciences workforce, and to increase opportunities for entrepreneurship and growth in the life sciences cluster. Companies like Pfizer and Regeneron have led the way in establishing their headquarters in the Mid-Hudson. New York Medical College, Touro College of Osteopathic Medicine, and Manhattanville College's development of a School of Nursing and Health Sciences were well underway before the pandemic, supporting the talent pipeline to fill critical roles in the life sciences space. Additionally, BioInc@New York Medical College has continued to cultivate entrepreneurship in the life sciences as the region's only biotechnology incubator. The state was prescient in calling out the life sciences cluster as a priority well before the pandemic.

The pandemic has highlighted the importance of the life science cluster. The State's support for companies including Hudson Holdings Group/NY Critical Materials, Altor Safety, Ziel/Hudson Valley Mask Co, Regeneron, and Pfizer have been critical in responding to the COVID-19 crisis.

The life sciences cluster has faced a number of new challenges, including a continued lack of a highly skilled local workforce. Cybersecurity is another challenge for life sciences companies, but which also permeates all parts of the Council's **LIVE, WORK** and **PLAY** strategy. Within this specific cluster, cybersecurity is an immediate challenge that needs to be addressed on all levels, as the use of technology exponentially grows within the life sciences cluster.

There also remain challenges for entrepreneurs within this cluster as they seek to establish themselves and grow their businesses. Access to capital, predictable and streamlined local permitting processes, and expedition of the processing of required licenses are all contributing factors.

Projects that may address this area:

- Create a direct relationship among the SUNY system, BOCES and other higher education institutions for career pathways and professional certification curriculum coordination, creating a local pool of talent for this growing sector at all levels
- Streamline permitting and licensing systems to quickly advance and grow this cluster
- Connect the life sciences cluster to other priority clusters in the region, including information technology and the region's many small businesses, including minority and women-owned business enterprises (MWBE)
- Attract and grow the life science cluster in the region's Opportunity Agenda and distressed communities, creating career pathways in the good-paying life sciences cluster

Intersection of Workforce, Education, and Economic Development

The Council seeks to reimagine, reintegrate, and rebuild the workforce to enhance mobility and connectivity to employment opportunities. As highlighted earlier in this report, there is a need to provide pathways for those outside the workforce and those who are unemployed back into the workforce.

Projects that may address this area:

- Improve access to the pipeline for existing jobs and assist in the training for jobs and skills of the future
- Address barriers to full employment such as child care, transportation, and housing affordability
- Create new pathways for the workforce from the hardest hit industries to higher performing sectors
- Improve transportation systems to support a mobile workforce
- Leverage the talent pipeline of 2-year and 4-year college graduates, as well as graduates from vocational programs, retaining this critical workforce in the region and state
- Increase the availability of quality, affordable child care to cover off-school hours, shift work and weekends (24/7)

Dutchess Community College Aviation Education Center, Wappingers Falls, Dutchess County

WORK: Past Project Highlight

Project Name: Spectrum Designs Expansion
(CFA #93745)

Location: Village of Pleasantville, Westchester County

The Long Island-based Spectrum Designs Foundation has expanded to Westchester County and will employ individuals on the Autism Spectrum who receive personalized, extensive pre- and on-the-job training to be successful and gain valuable skills in the workforce. Spectrum Designs Foundation has invested over **\$2.2 million** to purchase and equip an 8,400 square foot commercial property in Pleasantville to expand their custom apparel and promotional products business, allowing them to produce twice as many goods while enriching the Westchester community. To assist with this project, the MHREDC awarded Spectrum Designs Foundation a Round IX Capital Grant of **\$240,000** through Empire State Development for this project which will create 18 new jobs in the next three years. Lieutenant Governor Kathy Hochul attended the grand opening event for this new facility in April 2021.

WORK: Past Project Highlight

Project Name: Star Kay White Expansion
(CFA #63707)

Location: Hamlet of Congers,
Town of Clarkstown, Rockland County

Star Kay White, a flavor base and extract manufacturing company that has been in business in New York since 1890, completed a new facility and renovations in February 2020. Star Kay White was founded in Manhattan and later operated a factory in the Bronx before moving to Congers in 1984. The company's footprint in Congers has since expanded several times. The company has been run by the same family, the Katzensteins, since it was founded. Today, the fifth generation of Katzensteins works at Star Kay White. To encourage the company to expand in New York, the MHREDC awarded a Capital Grant in Round VI of **\$2.25 million** as well as up to **\$350,000** in Excelsior Jobs Program tax credits. The project upgraded the company's infrastructure, technology and equipment, making its manufacturing processes more efficient and better able to meet customer needs. The company will create 21 new jobs in the new facility.

PLAY

The **PLAY** initiative represents a vital element of overall economic wellbeing of the Mid-Hudson region. While the pandemic ravaged the hospitality and tourism industry cluster, the resiliency of the region's incredible work ethic and entrepreneurial spirit have facilitated a strong comeback thus far.

The REDC's support of the businesses that were devastated over the last year has never been stronger. The goals of the REDC to continue on its quest to foster new business openings and expansion of the hospitality and tourism economy will facilitate an even greater appreciation for the region's rich culture, history, entertainment venues and recreational and outdoor experiences by its residents and visitors.

Types of projects that may address this initiative:

- Support adaptive reuse of vacant facilities into entertainment and recreational venues
- Facilitate the establishment of sustainable and environmentally friendly attractions throughout the Mid-Hudson region
- Create a career pathway for the unemployed and underemployed within the hospitality and tourism sector, including training and opportunities for advancement
- Increase tourism travel and spending in the region, and explore ways to convert tourists to residents based on the quality of life assets in the region
- Showcase how lower-wage entry-level positions in hospitality and tourism can evolve into higher-wage careers
- Support the development of food manufacturing utilizing locally sourced agricultural commodities
- Leverage state and regional assets like the Empire State Trail, Parks, cultural and historical sites, etc.

PLAY: Past Project Highlight

Project Name: City Winery Hudson Valley (CFA #80700)

Location: Village of Montgomery, Orange County

City Winery's \$10 million rehabilitation and expansion into the region establishes their centralized wine production facility and concert venue in the Village of Montgomery, Orange County at the former historic 22-acre Worsted Mills, located along the Wallkill River. This new facility includes a restaurant and bar, as well as a multipurpose event space which can host events such as tastings, weddings, corporate galas, and local trade events. The project pays homage to Worsted Mills history and many parts of the Mills have been repurposed, keeping the original character of the building which helped establish the Village of Montgomery. Originally built as a grist mill in 1813, the current Worsted Mills facility was built in 1892 after a fire destroyed the original structure the prior year. In the years before the acquisition of the building, the Mills were mostly empty, abandoned and falling into disrepair. The project also allows the company to easily distribute wine from the Hudson Valley across the country, showcasing New York's contribution to the wine industry on a national scale. City Winery plans to create its own electricity from the Mill's generators, supported by supplementary solar power. City Winery was awarded an \$832,000 ESD capital grant, recommended by the MHREDC during Round VIII of the Regional Council initiative. Additionally, the project was awarded a \$240,000 Market New York grant through I LOVE NY, New York State's Division of Tourism, to promote the winery's events. NYSERDA also awarded City Winery more than \$805,000 as the winery will achieve net zero energy performance through efficiency improvements to existing buildings and use of an existing hydroelectric turbine on the Wallkill River.

Statewide Priorities

Since 2011, the Council has responded to the state’s call to prioritize various issues by integrating those issues into the region’s **LIVE, WORK, PLAY** strategy. The table below identifies which regional strategy component(s) addresses each state priority.

Table: State Priority and Regional Strategy Alignment

State Priority	LIVE	WORK	PLAY
Business Incubators and Hot Spots		•	
Child Care	•	•	
Downtown Revitalization & Placemaking	•		•
Environmental Justice	•		•
Life Sciences		•	
Opportunity Agenda	•	•	
Regional Economic Cluster Plan: Food & Beverage Manufacturing Supply Chain		•	•
Workforce Development	•	•	•
Veterans		•	

The following pages provide an overview of the Council’s approach to the statewide priorities listed above, and a more detailed discussion of two of the state priorities – child care and workforce development – including progress made to date, challenges that have surfaced or been exacerbated by COVID-19, and how the Council integrates the statewide priorities into its **LIVE, WORK, PLAY** strategy. Please note that the Life Sciences priority area is not addressed in this section, as it is discussed on pages 26-27.

Safe Harbors of the Hudson, Newburgh, Orange County

Child Care

Progress to Date

Access to quality, affordable child care has emerged as a theme in the MHREDC's exploration of barriers to workforce participation and development, and in 2019 Governor Cuomo charged the REDC's across the state to collaborate with local businesses and communities to identify child care needs and develop potential solutions.

The Council's work group focused on Workforce Development identified the following three goals related to child care:

- Better understand the current and long-term child care needs of the region's work force and future work force
- Increase labor force participation of parents and guardians in the region through improved access to quality affordable child care options
- Increase workforce development opportunities for professionals in the child care industry to support improvement in quality of child care in the region

Thanks to efforts by the Mid-Hudson Child Care Resource and Referral Agencies (CCRR), a webpage has been launched to help businesses and individuals connect with their local CCRR to learn about different types of child care, obtain referrals, and get one-on-one counseling from a child care specialist: www.hvchildcare.org. Even throughout the COVID-19 pandemic, the Council has promoted this webpage as a resource to businesses.

The Council will once again be looking to connect with the region's CCRR's to reassess child care resources and needs. Moreover, the Council continues to encourage applicants to funding programs through the CFA to identify strategies for addressing child care needs of their workforce and articulate this in their funding application.

Center for Discovery, Harris, Sullivan County

Challenges from COVID-19

At no time in our history has child care been more critical for our economic recovery. Child care has always been tied to the workforce but during the period of the pandemic it was felt keenly as children were forced to stay home and parents needed to serve a greater role in the provision of child care services.

A major barrier to the workforce and the success of future economic development is the role of child care. The pandemic exacerbated the need for child care and this challenge must be fully engaged to allow people to continue to return to work and gain new job skills through training, education, and apprenticeship programs. The need for child care ranges from infants, to pre-school, to elementary and middle school ages. This multifaceted and complex issue is magnified by the extreme disparity in wage rates for households working in lower paying jobs and shift work-based employment. These barriers also exist in moderate to higher paying jobs within the industry sectors of warehouse distribution, manufacturing, police, fire, education and healthcare.

The pandemic has also resulted in a greater level of shift work. Many manufacturing and warehouse distribution centers are returning to "business as usual" and some have kept their expanded hours to be able to keep up with production demands, adding or expanding second and even third shifts. This has increased the need for flexible child care to cover an increase in shift work. As more employment opportunities in the Mid-Hudson region continue to grow in industries that primarily operate through shifts, addressing this need is critical.

The region faces many challenges as the economy evolves into whatever the new normal will be. There is a mismatch between the current workforce and the skills needed for the future. The region's SUNY system represents an enormous opportunity to meet this challenge. Intermediate and long-range challenges in the workforce include a growing shift toward automation and robotics, which will change the operations and workforce landscape in the warehouse and distribution sector as well as manufacturing.

Once again, flexible child care is paramount to allow parents to attend job training, certificate and licensing programs, and higher education degrees programs.

Workforce Development

Progress to Date

Workforce Development has long been at the center of the MHREDC's strategy, at the intersection of **LIVE**, **WORK**, and **PLAY**. People truly drive the economy. The MHREDC seeks to develop, attract, and retain a quality workforce in the region, focusing on connecting the short and long-term industry talent needs with the Mid-Hudson's many educational institutions to create a pipeline for employment.

Prior to the pandemic the unemployment rate was at its lowest in fifty years, and employers in every sector were looking for workforce. The Council's Veterans and Workforce Development Work Group has continued to build upon the sector-based workforce development initiatives of the past to ensure the current strategy includes identifying the training needs of workers and those seeking opportunities and growth. The Council continually monitors the state of the regional economy and workforce needs.

The goals for workforce development established by the Council include:

- Grow the region's talent base for priority industries
- Establish ongoing framework for connections between priority industries and workforce development entities, including educational institutions
- Increase opportunities for veterans and other underserved populations to secure employment
- Increase the labor force participation in the region

The Council reviewed over 80 applications to the State's Workforce Development Initiative (WDI), Governor Cuomo's **\$175 million** investment in job training projects. Over 40 awards were granted, advancing workforce development efforts in manufacturing, healthcare, and energy, and supporting many who face significant barriers to employment.

The Council's efforts in workforce development fall under the **WORK** strategy. For more information on this strategy and how it has been affected by COVID-19, please refer to pages 16-17 of this report.

Crepini, Fishkill, Dutchess County

Business Incubators and Hot Spots

The state has designated 10 Innovation Hot Spots – one for each economic development region – and 20 certified business incubators, which receive funding to reach a greater number of early-stage companies. Support varies by location but generally includes: physical space; shared administrative staff; access to capital; coaching; mentoring; networking connections; prototype development; and access to other technical services. Innovation Hot Spots also coordinate regional entrepreneurial ecosystems, and can offer tax benefits to client businesses.

Through the CFA process, the Council has identified and supported two entities through this initiative:

- Biolnc@NYMC – The region’s only biotechnology incubator offers shared resources, turnkey wet lab space and sponsored professional services to promising, high-potential entrepreneurs and start-ups
- Hudson Valley Center for Innovation (Accel7) – Accel7 is the oldest, continuously operating business and tech accelerator serving the Hudson Valley between Westchester and Albany, focusing on building and launching Environmental, Social & Governance (ESG) solutions with early-stage entrepreneurs

Downtown Revitalization & Placemaking

The MHREDC’s **LIVE** and **PLAY** initiatives intersect with the state priority of placemaking and downtown revitalization. The Council recognizes that vibrant downtowns are critical in efforts to attract new companies and grow existing businesses that will create new job opportunities in the state. Each year, the Council seeks to support projects that rehabilitate and enhance the region’s unique and diverse community centers, particularly ones that make use of smart growth principles and transit-oriented development.

Five years ago, the state launched the Downtown Revitalization Initiative (DRI) to propel the advancement of geographic hubs within municipalities. Each year from 2016-2019, all municipalities were invited to submit an application to compete for \$10 million to both develop a strategic investment plan with community input and then implement the plan to the maximum benefit of the community, region, and state. Each REDC was tasked with identifying the winning community each year. The cities of Middletown, Kingston, New Rochelle and Peekskill are the past winners of the DRI. A visit to each of these downtowns will show demonstrable positive changes in launching their revitalization forward.

The Council looks forward to future rounds of the DRI and will once again actively promote the opportunity throughout the region.

Safe Harbors of the Hudson, Newburgh, Orange County

Environmental Justice

Environmental justice calls for the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation and enforcement of environmental laws, regulations and policies. The Council believes that no group shall bear a disproportionate share of the negative consequences resulting from the industrial, municipal, and commercial operations or the execution of federal, state, local, and tribal programs or policies.

The MHREDC believes that environmental justice shall include, but not be limited to, the equitable placement of facilities such as water and sewer treatment, salt sheds, jails, waste disposal or transfer stations and those related to the new Green Economy, to ensure there is not a discriminatory set of decisions that result in a disproportionate number of said facilities being sited in communities that would be considered poor or of limited means to reject such placement.

The goals of the MHREDC’s environmental justice strategy include:

- Increased awareness and understanding of environmental justice and its connection to economic development among key stakeholders throughout the region, including the business community and economic development organizations
- Improved access to environmental justice data within the region, so that the Council is well-informed about challenges and opportunities to achieve greater environmental justice in the region
- Inclusion of all groups potentially affected by a project as early as possible, ensuring all voices are heard as development decisions are made

Opportunity Agenda

In 2013, Governor Cuomo charged the REDCs to develop and implement plans to support economically distressed communities by way of the Opportunity Agenda.

The MHREDC has identified two goals, and keeps these goals top-of-mind when evaluating CFA proposals:

- 1.** To move impoverished individuals throughout the region into jobs that can sustain them and their families
- 2.** To revitalize distressed communities

The communities identified as part of the Opportunity Agenda are: City of Kingston, City of Middletown, City of Mount Vernon, City of New Rochelle, City of Newburgh, City of Peekskill, City of Poughkeepsie, City of Yonkers, Village of Brewster, Village of Monticello.

Regional Economic Cluster Plan: Food & Beverage Manufacturing Supply Chain

The MHREDC identified the “Food and Beverage Manufacturing Supply Chain” as a manufacturing-based industry cluster to prioritize in 2015. This cluster, as defined by the MHREDC, includes the interrelated sub-industries of food and beverage manufacturing, processing, and equipment. These industries share distribution channels and customers; manufacture complementary products; and are related by skills, technologies, specialized machinery / infrastructure, and other common inputs; so the Council felt it appropriate to link them together under one relatively broadly defined cluster in 2015.

The Council seeks to: 1) assist entrepreneurs in the food manufacturing business to process and test food products; 2) ensure alignment and partnering with New York State assets in the Region; and 3) support the continued expansion and investment initiatives of companies in the region that have approached the Council for funding.

Veterans

The Council seeks to increase opportunities for veterans to secure employment as part of its efforts in Workforce Development. One of the ways this can be achieved is to increase employers’ understanding of the United States military occupational specialty code (MOS) and how that corresponds to the North American Industry Classification System (NAICS). Through the work of the MHREDC Veterans & Workforce Development Committee, many employers are pleasantly surprised to learn of the skillsets and proficiencies that veterans possess due to the technical training received towards their military occupations. The challenge that exists is the lack of coordination and outreach to prospective employers on the close correlation between the two occupational classification systems. Targeted efforts made by the federal, state and local governments to assist employment centers, local chambers of commerce and economic development organizations better navigate the relationship between these systems will have a measurable impact on veterans employment statistics.

PART THREE

PARTICIPATION

The Mid-Hudson REDC seeks to be inclusive in soliciting input on the regional strategy and implementation. This section of the report offers an update on the Council's Work Groups followed by an update on the Council's public outreach efforts.

Work Groups

In 2019, the MHREDC streamlined the number of Work Groups from eight to four to better align with the **LIVE**, **WORK**, and **PLAY** strategy. For this year, the Council will continue with the following four Work Groups: **LIVE**, **WORK**, **PLAY** and **WORKFORCE**.

Goals: While the Work Groups will remain intact, albeit with a few subtle changes, their goals will have to adapt to the new world we face as we analyze the impact of COVID-19. Moreover, the COVID-19 pandemic has underscored the interconnected nature of the components of the MHREDC's **LIVE**, **WORK**, **PLAY** strategy, and the Work Groups will seek coordination and synergy with one another in their efforts toward their goals.

The Work Group goals include:

1. Drive progress on key components of the MHREDC's strategy
2. Provide opportunities for stakeholders and members of the public to contribute to the REDC process
3. Facilitate connections among the business, not-for-profit, academic, and government sectors
4. Identify barriers and develop solutions across various industry sectors to advance economic development
5. Monitor how the regional strategy and the lingering effects of COVID-19 on the region's economy
6. Apply the lens of diversity, equity, and inclusion to each Work Group so that the Council can be more intentional in how it views the tools that are available to the Council to assist communities that need greater assistance
7. Inform the full Council on developments and recommendations to advance the regional strategy, recover from COVID-19, and grow the economy

LIVE

The LIVE group's mission is to identify challenges, resources, and best practices for key issue areas and present solution recommendations. Key issue areas include: Infrastructure, Planning (including smart growth and TOD), Opportunity Agenda, Retention and Attraction of residents, Revitalization, Workforce

WORK

The Work Group's mission is to identify and assess challenges and assets that are key to strengthening the growth, retention and attraction of priority industry clusters/tradeable sectors in the Mid-Hudson region while also spurring innovation. Priority Industry Clusters: Life Sciences, Advanced Manufacturing, Information Technology, Financial & Professional Services, Distribution, Film & TV, Innovation, Hospitality, Healthcare, Small Business and MWBE.

PLAY

The Play Group's mission is to support all aspects of the regional tourism economy, including strengthening the Mid-Hudson brand, facilitating sustainable growth of the tourism industry, as well as the growth of the Food & Beverage Manufacturing Supply Chain.

WORKFORCE *(formerly Veterans and Workforce Development)*

The Workforce Group's mission is to develop, attract and retain a quality workforce in the region, focusing on connecting short and long-term industry talent needs with the Mid-Hudson's many educational institutions to create a pipeline for employment. While the name of this group is being updated, the group will continue to seek ways to increase opportunities for veterans and other underserved populations to secure employment.

Public Outreach and Engagement

In the decade since Governor Cuomo created the Regional Economic Development Councils, Mid-Hudson REDC has actively developed relationships with elected and community stakeholders to ensure as many as possible are aware of and have the opportunity to participate in the REDC initiative and to apply for funding programs available to support economic development.

To craft this report, the Council held two virtual public meetings – one in August 2020, and another in May 2021. The Council also held five executive session virtual meetings to ensure there were opportunities to discuss the impact of COVID-19 on the region and generate and synthesize the strategy.

Over the past year and a half, a number of county economic development leaders and business associations also shared reports, surveys, and data they have developed to understand the impact of the pandemic and to ideate the way toward building back better. Additionally, the Council has received analysis of labor market data from the New York State Department of Labor.

With assistance from Hudson Valley Pattern for Progress, this report is a synthesis of the input the Council received. The MHREDC will continue to monitor the effects of COVID-19 on the economy, and is charging its four work groups with this important role.

The state has launched a number of important programs to support businesses under its **“Business Pandemic Recovery Initiative”** and has also launched Round XI of the CFA process. The Council has actively sought to increase its outreach efforts over the past year, in close partnership with Empire State Development’s (ESD) Mid-Hudson Regional Office. The multifaceted outreach campaign involves weekly e-newsletters sent to more than 3,000 stakeholders promoting economic development opportunities and COVID-19 support for businesses.

To promote the state’s Business Pandemic Recovery Grant, ESD is working with business associations and economic development partners to host more than ten virtual webinars to ensure as many in-need businesses are aware of this unique opportunity to support their recovery.

The Council is hosting weekly webinars throughout the months of June and July, and expects to adjust this to biweekly in August and September. As of the writing of this report in June 2021, three virtual CFA Information Sessions have been held, with attendance for each ranging from 36 to 78, with a total of 156 attendees overall as of mid-June. The Council has also redesigned its website to improve the user experience of businesses looking to find information about the REDC process and upcoming events.

Through the work groups and public meetings, the Council will continue to provide ways to keep the public informed about the REDC process and offer opportunities to continue to refine the regional strategy as the region, state, and world continue to emerge from the COVID-19 crisis.

Lieutenant Governor Kathleen Hochul, DRI Project Announcements, Peekskill, Westchester County

PART FOUR

Previously Funded CFA Projects

The Mid-Hudson REDC reviews and identifies priority projects that align with and implement its **LIVE**, **WORK**, and **PLAY** strategy. Since 2011, the Council has identified 141 priority projects that have been awarded an investment from the state, with 78.0% complete or progressing. The Council endorses projects as priorities that have strong alignment with the regional strategy, state priorities, and will have a positive economic impact on communities, counties, and the region.

The leverage ratio represents the total project cost divided by the total state funds awarded. The leverage ratio for Mid-Hudson priority projects is 15.7:1, demonstrating the Council's commitment to maximizing the impact of public dollars.

The pages that follow include a map showing the approximate location of priority projects, as well as summary tables showing the current status of CFA-awarded projects. The project data used in this report was pulled from the CFA system on June 7, 2021.

All Past Projects Awarded CFA Funding

In spite of the pandemic, many of the Mid-Hudson's awarded projects from rounds I through IX have continued to make progress and implement the Mid-Hudson REDC's **LIVE, WORK, PLAY** strategy. Of the 921 awards that have been granted over the years, 87% are complete or progressing. The ratio of total project cost to total awards for all Mid-Hudson CFA projects is 7.5:1. The state awards through the REDC process are projected to generate more than \$2.7 Billion in economic activity in the region.
